## PROFESSIONAL SUMMARY

I'm someone who enjoys building things that actually work—whether it's an automation system, a SaaS dashboard, or an AI feature. Over the past few years I've managed and delivered projects at Amazon, startups, and nonprofits, learning how tech, design, and people come together to solve real problems.

I started my career early while still studying, and that helped me grow fast in planning, communication, and leading small teams. Lately, I've been working more with AI and automation tools like n8n, Zapier, and OpenAI APIs. My goal now is to move deeper into **Product and Automation Management**, where I can connect business goals with smart, user-friendly technology.

## PROFESSIONAL EXPERIENCE

**Amazon – Gurugram, India**
*Technical Project Manager – Product-Led Initiatives | Sep 2024 - Present*
- Manage product-driven internal projects improving scalability and delivery speed.
- Coordinate with engineers, designers, and business teams to deliver clear outcomes.
- Introduced small process improvements that raised sprint throughput and predictability.

**Conscious Humanity Network Foundation – Remote (Part-time)**
*Freelance Project Manager – Platform Development | Jun 2025 - Present*
- Support development of a global non-profit aggregator platform.
- Define MVP scope, track progress, and keep distributed teams aligned.
- Simplified collaboration tools and reporting for remote contributors.

**Think More Services – Rajasthan, India**
*Product Delivery Lead / Product Operations Associate | May 2023 - Sep 2024*
- Oversaw SaaS platform delivery from client discovery to rollout.
- Balanced timelines, scope, and risk to meet release goals ahead of schedule.
- Used customer feedback to enhance workflows and improve satisfaction.

**Velozity Global Solutions – Bengaluru, India**
*IT Project Coordinator  |  Nov 2022 – Apr 2023*
- Coordinated cross-functional teams delivering internal IT tools for 20+ employees.
- Built dashboards & logs improving stakeholder visibility and traceability.

## KEY PROJECTS

**TextSpark – AI WhatsApp Marketing Automation Platform**
*Python • Appwrite • PyWhatKit • OpenAI/Ollama API*
Built an AI-powered WhatsApp marketing system that generates 25 + personalized messages per campaign and sends them automatically via PyWhatKit.
**Role:** Product Owner & Developer

**PRISM – AI Task Prioritization Tool**
*Flask • OpenAI API*
Developed an AI-based Eisenhower Matrix that ranks tasks by urgency and importance.
**Role:** Product Owner & Developer

**Project Management Tracker Dashboard**
Designed a web dashboard to track tasks, risks, and stakeholder updates for distributed teams.

**Cybersecurity Awareness & Phishing Detection Platform**
*Flask • MySQL • JWT*
Created a phishing-detection web app using Google Safe Browsing APIs with secure dashboards.
**Role:** Full-Stack Developer & PM
